TUNGSTEN SPECIAL NYMPHS

TUNGSTEN BEADHEAD PRINCE NYMPH

TUNGSTEN BEADHEAD PRINCE NYMPH

The Tungsten Beadhead Prince Nymph fly pattern is a popular and effective nymph pattern used in fly fishing.

It is a variation of the classic Prince Nymph pattern, but with the addition of a tungsten beadhead to help it sink quickly and get down to where the fish are feeding.

The fly is typically tied on a curved or straight shank hook, with a body made of peacock herl and brown or olive dubbing.

It also features a white or cream-colored biot tail and a wingcase made of peacock herl, which gives the fly its distinctive appearance.

The tungsten beadhead is added to the front of the fly to help it sink quickly.

Price: \$1.19

TUNGSTEN JIG PHEASANT TAIL SOFT HACKLE

TUNGSTEN JIG PHEASANT TAIL SOFT HACKLE

The Tungsten Jig Pheasant Tail Soft Hackle is a modern variation of the classic Pheasant Tail Nymph, a popular and effective fly pattern used by fly fishermen around the world.

The addition of a tungsten jig hook and soft hackle make this pattern even more effective in a variety of fishing situations.

The tungsten jig hook provides extra weight and ensures that the fly sinks quickly to the bottom, making it ideal for fishing deep pools and runs.

TUNGSTEN BEADHEAD ZUG BUG

TUNGSTEN BEADHEAD ZUG BUG

The Tungsten Beadhead Zug Bug is a popular fly pattern used in freshwater fishing for trout, steelhead, and other species.

It is a variation of the classic Zug Bug pattern, with the addition of a tungsten beadhead that adds weight and helps the fly sink quickly.

This tungsten zug bug fly typically features a body made of peacock herl, with a tail made of brown hackle fibers and a ribbing made of copper wire.

The tungsten beadhead is typically silver or gold in color and is placed at the front of the fly, just behind the eye.

The weight of the tungsten beadhead helps the fly get down quickly in the water column, making it ideal for fishing in fast-moving currents or deep pools.

TUNGSTEN BEADHEAD FLASHBACK PHEASANT TAIL

TUNGSTEN BH FLASHBACK PHEASANT TAIL

The Tungsten Beadhead Flashback Pheasant Tail is a popular fly pattern used by fly fishermen for trout and other freshwater fish.

The fly consists of a body made of pheasant tail fibers, a thorax made of peacock herl, and a wing case made of a thin strip of mylar or similar material.

The fly gets its name from the tungsten beadhead that is used to weight the fly and help it sink to the desired depth in the water.

TUNGSTEN BEADHEAD COPPER JOHN

Tungsten Beadhead Copper John / Tungsten BH Copper J

The Tungsten Beadhead Copper John is a popular fly pattern used in fly fishing. It is a versatile nymph pattern that imitates a variety of aquatic insects, such as mayflies, stoneflies, and caddisflies. The fly is named after its creator, John Barr, and the copper wire used to form the body of the fly.

The Tungsten Beadhead Copper John is an effective fly when fished deep in rivers and streams, particularly in faster moving water. The tungsten bead provides weight and helps the fly sink quickly, while the copper wire and peacock herl create flash and attract fish. The fly can be tied in a variety of colors and sizes to match the natural insects present in the water.

TUNGSTEN BH PHEASANT TAIL NYMPH

TUNGSTEN BH - PHEASANT TAIL NYMPH

The Tungsten BH Pheasant Tail Nymph sinks quickly into the strike zone, thanks to the tungsten bead. It was originally tied by Frank Sawyer but has seen a fair amount of modifications over the years. It continues to be a very effective fly today.

Usually available in hook sizes: 12 | 14 | 16 | 18 | 20
